

6 (a) The ninth term of an arithmetic series is 3

The sum of the first n terms of the series is S_n and $S_{21} = 42$

Find the first term and common difference of the series.

[4 marks]

6 (b) A second arithmetic series has first term -18 and common difference $\frac{3}{4}$

The sum of the first n terms of this series is T_n

Find the value of n such that $T_n = S_n$

[3 marks]
