	Question		Answer	Marks	AO	Guidance	
13	**(a)**		E.g. The only region with very low location on both variables is Region D which is therefore London.	**E1**	**2.2a**	Or any other valid reason to connect Region D with London	**OR E1** for one region correct with good reasoning
			E.g. The region with the lowest standard deviation is Region B, so this is Wales	**E1**	**2.2a**	Or any other valid reason to connect Region B with Wales	**OR E2** for two regions correct with good reasoning
			E.g. The only value where the other two differ much is sd of *driving*; the wider spread on Region C including the outlier suggests that this is the Southwest, so Region A is the South East.	**E1**	**2.2b**	Careful argument involving mean and/or standard deviation	
				[3]			
13	**(b)**		E.g. No the data only shows that this LA has low proportions of car use for travelling to work.	**E1**	**2.2b**	Or any other valid explanation of why the data given is insufficient to draw this conclusion	Identifying the LA as the Scilly Isles is not relevant; this requires information that is not in the supplied data.
			E.g. No, many LAs in Region D (London) have similar proportions and they are not small islands.				
				[1]			
13	**(c)**		E.g. On a large island, methods of travel to work are unlikely to be different to any other LA; people will still be travelling to work on the roads, and provision of public transport will be similar to any other LA.	**E1**	**2.2b**	Or any other valid explanation of how large islands are likely to have similar patterns of method of travel to other LAs	Candidates may, but need not, identify the LA as Anglesey, but this is not sufficient to award the mark
