Question	Answer	Marks	AOs		Guidance
	<p>OR</p> <p>acceleration phase</p> $v = 0 + 2.5 \times 2 = 5 \text{ m s}^{-1}$  <p>using the distance to find the time it takes to stop using <i>areas</i> (second triangle):</p> $\frac{1}{2}(T - 2.5) \times 5 = 10$ <p><math>T = 6.5</math> so time to stop is 4 s.</p> <p>So <math>0 = 5 + 4a</math></p> <p>Giving <math>a = -1.25 \text{ m s}^{-2}</math></p> <p><math>[-R] = 1.5 \times (-1.25) = -1.875</math></p> <p>Magnitude of <math>R = 1.875 \text{ N}</math> (1.88 to 3sf)</p>	<p><b>M1</b> <b>A1</b></p> <p><b>M1</b> <b>A1</b></p> <p><b>M1</b> <b>A1</b> <b>[6]</b></p>		<p>Use of <i>suvat</i> equation(s) to find velocity. Do not allow if <math>s = 10</math> used</p> <p>Use of area and <i>suvat</i> equation(s) to find acceleration Must be correct sign</p> <p>Use of Newton's second law. FT their <math>a</math> <math>a \neq 2</math> Must be positive</p>	<p>Must recognise two phases of motion for first 4 marks</p> <p>Consistent sign convention needed for full credit.</p>
