

Question			Answer	Marks	AOs		Guidance
10	i			B1 B1 [2]	1.1a 1.1a	Two line segments with one horizontal ($T, 4$) and $(12.5, 4)$ labelled or indicated on scales. Allow their 2.5 marked instead of T . On axes labelled v and t oe	
	ii		$\frac{1}{2} \times 4 \times (12.5 + (12.5 - T)) = 45$ $T = 2.5$	M1 A1 [2]	3.1a 1.1b	Attempt to find area of trapezium or both the triangle $\left(\frac{1}{2}T \times 4\right)$ and the rectangle $(12.5 - T) \times 4$. cao	<i>Suvat</i> equations can be used for two phases of motion.
	iii		EITHER $a = \frac{4}{2.5} = 1.6 \text{ m s}^{-2}$ $s = \frac{1}{2} \times 1.6t^2 = 0.8t^2$	M1 A1 [2]	1.1a 3.3	Soi FT their T	
			OR $a = \frac{4}{2.5} = 1.6 \text{ m s}^{-2}$ $v = \int a \, dt = 1.6t + c$ When $t = 0, v = 0$ so $c = 0$ $s = \int v \, dt = 0.8t^2 + c$ When $t = 0, s = 0$ so $c = 0$ Giving $s = 0.8t^2$	M1 A1 [2]		Soi FT their T Must be complete solution – do not award without consideration of $+c$ at least once	
	iv		$0.8t^2 = 4$ $t = \sqrt{5} = 2.24 \text{ s}$	B1FT [1]	3.4	FT their quadratic model in (iii)	

Question		Answer	Marks	AOs	Guidance
v			B1 [1]	1.1a	Must have curved section of the graph decreasing gradient. S must be labelled.
vi		<p>Total distance (area under the graph) can only be equal if $S > T$ If $S > T$</p>  <p>If $S = T$</p>  <p>If $S < T$</p> 	E1 [1]	3.5c	Needs to give reason relating to the refinement of the model. Graphs not required “It takes longer to reach 4 ms^{-1} is not sufficient reason
